# EB10100 - Goat Anti-CXCR1 Antibody

Size: 100µg specific antibody in 200µl

### **Target Protein**

**Principal Names:** C-C, C-C-CKR-1, CD128, CD181, CDw128a, chemokine (C-X-C motif) receptor 1, CKR-1, CMKAR1, CXCR1, IL-8 receptor type 1, IL8R1, IL8RBA, interleukin 8

receptor alpha, interleukin 8 receptor, alpha, IL8RA

Official Symbol: IL8RA

Accession Number(s): NP\_000625.1

Human GeneID(s): 3577

#### **Immunogen**

Peptide with sequence C-SKEFLARHRVTSY, from the C Terminus of the protein sequence according to NP\_000625.1.

Please note the <u>peptide</u> is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

## **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:1000.

Western blot: Preliminary experiments gave an approx 100kDa band in Human Peripharal Blood Mononucleocytes lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 39.8kDa according to NP\_000625.1. The 100kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### **Species Reactivity**

Tested:

Expected from sequence similarity: Human
