# EB09704 - Goat Anti-DTX1 / Deltex-1 Antibody

Size: 100µg specific antibody in 200µl

# **Target Protein**

Principal Names: DTX1, deltex homolog 1 (Drosophila), hDx-1, deltex homolog 1 Official Symbol: DTX1 Accession Number(s): NP\_004407.2 Human GeneID(s): <u>1840</u> Non-Human GeneID(s): 14357 (mouse), 687424 (rat)

### Immunogen

Peptide with sequence CHHIENVLKEDAR, from the internal region (near N Terminus) of the protein sequence according to NP\_004407.2.

Please note the peptide is available for sale.

# **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

# **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:8000.

**Western blot:** Preliminary experiments gave an approx 48kDa band in Mouse Fetal Brain lysates and in lysates of NIH3T3 after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 67.4kDa according to Human NP\_004407.2 and of 68.2kDa according to Mouse NP\_032078.2. The 48kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### **Species Reactivity**

**Tested:** 

Expected from sequence similarity: Human, Mouse, Rat, Dog, Cow
