## EB08560 - Goat Anti-ERN2 / IRE1b Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** ERN2, endoplasmic reticulum to nucleus signaling 2, IRE1b, ER to nucleus signalling 2, IRE1 beta, IRE1, S. cerevisiae, homolog of, endoplasmic reticulum to nucleus signalling 2, inositol-requiring 1 beta

**Official Symbol:** ERN2

**Accession Number(s):** NP\_150296.3

**Human GeneID(s):** [10595](#)

### Immunogen

Peptide with sequence C-QKRLQSPSKQAQPLD, from the internal region of the protein sequence according to NP\_150296.3.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:4000.

**Western blot:** Preliminary experiments gave an approx 37kDa band in Human Duodenum, Pancreas and Placenta lysates after 0.3µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 107kDa according to NP\_150296.3. The 37kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human
