Research Use Only. Not for diagnostic or therapeutic use.

EB07064 - Goat Anti-ITPR3 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: ITPR3, inositol 1,4,5-triphosphate receptor, type 3, HGNC:6182,

FLJ36205, IP3R, IP3R3 Official Symbol: ITPR3

Accession Number(s): NP_002215.2

Human GenelD(s): 3710

Important Comments: No cross-reactivity expected with other types of ITPR

Immunogen

Peptide with sequence C-DKKERPTDEEGFLH, from the internal region of the protein sequence according to NP_002215.2.

Please note the <u>peptide</u> is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:128000.

Western blot: Preliminary experiments gave an approx 60kDa band in Human Adipose, Colon, Duodenum, Heart and Liver lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 304kDa according to NP_002215.1. The 60kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Dog, Cow
