## EB07646 - Goat Anti-NDFIP1 Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** NDFIP1, Nedd4 family interacting protein 1, MGC10924, N4WBP5, Nedd4 WW domain-binding protein 5

**Official Symbol:** NDFIP1

**Accession Number(s):** NP\_085048.1

**Human GeneID(s):** [80762](#)

**Non-Human GeneID(s):** 65113 (mouse), 291609 (rat)

### Immunogen

Peptide with sequence C-NYAKVRKMPET, from the internal region of the protein sequence according to NP\_085048.1.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:16000.

**Western blot:** Western Blot: Preliminary experiments gave an approx 20kDa band in Human Lymph Node, Thymus and Thyroid Gland lysates after 0.1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 24.9kDa according to NP\_085048.1. The 20kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human, Mouse, Rat
