EB12049 - Goat Anti-Netrin-G1 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: NTNG1, netrin G1, Lmnt1, YLSR571, axon guidance molecule, laminet

1, laminet-1, netrin G1f, netrin-G1

Official Symbol: NTNG1

Accession Number(s): NP_001106697.1; NP_001106699.1; NP_055732.2

Human GenelD(s): 22854

Non-Human GenelD(s): 80883 (mouse), 295382 (rat)

Important Comments: This antibody is expected to recognize 1, 2, 3.

Immunogen

Peptide with sequence C-SLYGQLDTTKKLRD, from the intenal region of the protein sequence according to NP_001106697.1; NP_001106699.1; NP_055732.2.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:128000.

Western blot: Preliminary experiments gave an approx 29kDa band in Human, Mouse and Rat Brain lysates from different regions after 0.1μg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 49.3kDa according to NP_055732.2. The 29kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Dog, Cow
