## EB07588 - Goat Anti-TCF2 / VHNF1 Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** TCF2, VHNF1, transcription factor 2, hepatic LF-B3 variant hepatic nuclear factor, FJHN, HNF1B, HNF1beta, HNF2, LFB3, MODY5, transcription factor 2

**Official Symbol:** HNF1B

**Accession Number(s):** NP\_000449.1; NP\_001159395.1

**Human GeneID(s):** [6928](#)

**Non-Human GeneID(s):** 21410 (mouse), 25640 (rat)

**Important Comments:** This antibody is expected to recognize both reported isoforms (NP\_000449.1; NP\_001159395.1). This product may cross-react with HNF1A.

### Immunogen

Peptide with sequence C-QAYDRQKNPSKEER, from the internal region of the protein sequence according to NP\_000449.1; NP\_001159395.1.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:64000.

**Western blot:** Approx 60kDa band observed in Human Liver lysates (calculated MW of 61.3kDa according to NP\_000449.1). Recommended concentration: 0.1-0.3µg/ml. Primary incubation was 1 hour. An additional band of unknown identity was also consistently observed at 100kDa. This band was successfully blocked by incubation with the immunising peptide. This antibody was successfully used in WB on Mouse in the following paper: Arenas F et al. (2008) PMID: 18188457.

**Immunocytochemistry:** A customer found positive results in ICC on Human primitive gut tube from Human embryonic stem cells.

### Species Reactivity

**Tested:** Human, Mouse

**Expected from sequence similarity:** Human, Mouse, Rat, Dog, Pig, Cow, Zebrafish

### Specific References

**This antibody has been successfully used in WB in the following paper:**
